CSE BLISS**

CSE BLISS

MANUFACTURING, LLC

CSE Bliss Hammermills are designed to achieve optimum performance that lasts, even for the most demanding applications.

Our hammermills are manufactured using over 40 years of experience along with using customer suggestions that you can only get being directly in the industry.

CSE offers our hammermills in a variety of sizes, which allows us to meet any size reduction needs that our customers may have.

CSE prides itself on being able to offer the best quality and value of any other hammermill on the market today.

KEY FEATURES

Housings

- The housings are made of heavy duty 3/8"-1" A36 steel plate
- Reduced noise level
- The housing is made to remove rotor from the side without removing bearings from the shaft.
- Vibration Safety Switch

Optional Features:

- Directional Gate
- Vibrations Monitoring or Vibration sensor switch
- Dual Motor Base

Bearings

CSE Bliss Hammermills come standard with Dodge Imperial Bearings. These bearings are two pieces that house a spherical roller bearing with a taper lock to secure the bearing to the shaft.

Optional Features:

- Bearing Temperature sensor

Internal Wear Parts

- CSE Bliss has easy replacable wear plates to assure protection of the housing to give the hammermill a longer life.

Doors

- Our hammermills have sliding doors that are made from 3/8" steel plate.
- The doors are on heavy duty rollers that allow the doors to slide with ease and convenience.
- Reduces foot print
- Gives the operator full access to the grinding chamber for easy maintenance.
- Safety switch

Optional Features:

- Trapped key door safety interlock switches

Rotors

- Rotors are completely machined and assembled with spanner nuts.
- The rotor has dual positions for coarse and fine hammer positions.
- Rotors are precision balanced and tested with the hammermill at operating speed to break the bearings in and assure the vibration is in tolerance. This insures a problem free startup.

Spring Loaded Screen Carriages

- Laser cut to hold precision fit to the wear plate
- These screens prevent any leakage
- Screens Carriages are made of 1/4" x 1 1/4" mild steel

Model#	DIAMETER	RPM	TIP SPEED	HP	SCREEN AREA
